IN THE CLAIMS:

Cancel claims 37-38.

Reasons for Allowance

2. The following is the reasons for allowance claims 19-36: The present invention is a method and a computer readable medium carrying one or more sequences of instructions for interpolating a color value at a target pixel in a digital image. Independent claims 19 and 36 identify unique distinct features "if there is not an edge in the vicinity of the target pixel, then performing long scale interpolation using image data values in the local array and if there is an edge in the vicinity of the target pixel, then performing short scale interpolation using image data values in a subset of the local array in a closer vicinity of the target
